VARDHAN YERRAMSETTI

Python Full Stack Developer | AWS Certified Cloud Practitioner | Data Science

+91 7386033417 | vardhanyerramsetti71@gmail.com | Andhra Pradesh, India
vardhan-yerramsetti.vercel.app | github.com/vardhanyerramsetti71beep | linkedin.com/in/vardhan-yerramsetti

PROFESSIONAL SUMMARY

Python Full Stack Developer experienced in production APIs, cloud-hosted data products and interactive web experiences. Skilled in Flask, FastAPI, React, AWS, SQL optimization, machine learning and creative WebGL development. Delivered 10 live projects across Vercel and AWS.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL, C++, HTML5, CSS3
Frontend & Creative Dev: React, Next.js, Vite, Three.js, GSAP, ScrollTrigger, Lenis, Tailwind CSS
Backend & Data: Flask, FastAPI, Django, REST APIs, MySQL, PyMySQL, JWT, Scikit-learn, OpenCV
Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, IAM), Docker, Vercel, Git/GitHub

SELECTED TECHNICAL PROJECTS

Vignesh Traders — Car Care Studio Website

HTML5, CSS3, JavaScript (ES6+), Inline SVG, Vercel | Live: vignesh-traders.vercel.app | Code: github.com/vardhanyerramsetti71beep/vignesh-traders

• Designed and built the website for a car care and detailing studio in Vijayawada: 8 services, 3 fixed-price packages and a no-backend booking flow that hands off to WhatsApp.

• Built a scroll-driven SVG scene, drawn entirely in code, where a car is washed outside and inside; scroll position drives clip paths, a mask and a camera zoom via requestAnimationFrame.

• Shipped with zero dependencies and no build step, with reduced-motion and no-JavaScript fallbacks.

CrunchLab — 3D Product Experience

Vite, Three.js, GSAP ScrollTrigger, Lenis, JavaScript, CSS | Live: crunchlab-blond.vercel.app | Code: github.com/vardhanyerramsetti71beep/crunchlab

• Created a scroll-driven 3D product site with a cinematic chip-storm loader, interactive hero carousel, flavour wall and build-your-own 3-pack experience.

• Generated all six product-pack visuals in code using canvases and real-time Three.js meshes, eliminating image and model assets.

• Added responsive motion controls that respect prefers-reduced-motion, including scroll, swipe, keyboard and autoplay interactions.

Scalable Task & Data Management Cloud Portal

Python, Flask REST API, React, MySQL, AWS EC2/S3, Docker | Live: task-cloud-portal.vercel.app

• Built a multi-tenant cloud portal with strict organisation-level isolation across tasks, files and audit logs.

• Engineered compound MySQL B-Tree indexes that reduced query execution from 18.4 ms to 13.8 ms.

• Decoupled binary storage into Amazon S3 and deployed containerized services on EC2 with Docker.

OmniPulse — CLV & Retention Engine

FastAPI, Scikit-learn, BG/NBD, Gamma-Gamma, Python | Live: omni-pulse-enterprise-clv-churn-int-teal.vercel.app

• Implemented BG/NBD and Gamma-Gamma models for real-time customer vitality and 12-month lifetime-value predictions.

• Delivered validated FastAPI inference endpoints with sub-15 ms prediction latency for churn-risk triage.

MoodHarmonics — Emotion Music Recommender

Python, Flask, OpenCV, Scikit-learn, WebRTC | Live: music-recommending.vercel.app

• Built a webcam-based facial-expression pipeline with over 90% classification accuracy and targeted music recommendations.

• Optimized OpenCV frame processing and Flask endpoints for low-latency live interaction.

WORK EXPERIENCE

Operations & Logistics Associate — Quess Corp Ltd. (at Instakart / Flipkart Logistics) | Jan 2026 – Apr 2026

• Supervised warehouse operations, order dispatch and inventory databases while maintaining 99% data integrity.

• Removed workflow bottlenecks between ground teams and dispatch systems, contributing to a 15% throughput increase.

Direct Marketing Coordinator — Quess Corp Ltd. (at Future Generali Total Health Insurance) | Sep 2023 – Dec 2023

• Ran multi-channel campaigns reaching 5,000+ prospects and analyzed funnels that increased qualified leads by 10%.

Teaching Assistant, Computer Science — Sri Srinivasa Gravity Junior College | Jun 2022 – Aug 2022

• Mentored 40+ engineering aspirants in CS fundamentals, OOP and problem-solving; led weekly Python and C++ debugging labs.

EDUCATION & CERTIFICATIONS

B.Tech, Computer Science & Engineering — Jawaharlal Nehru Technological University, Kakinada (2018–2026) | CGPA: 6.5/10
AWS Certified Cloud Practitioner (2023) | AWS Academy Graduate: Cloud Foundations (2023) | Android Enterprise Associate, Google (2022) | Networking Essentials, Cisco (2022)
